

GEON goes Remote

The service developments and structures continue to grow at GEON Legal Solutions.

Large review teams, clients, counsel and expert advisors are all key contributors during the litigation process, however reviewing case material

requires consistency and synchronicity. GEON has implemented a very secure and robust remote online access solution.

Documents can be accessed and reviewed at anytime from anywhere. Simply log in and work in your case from home or

while travelling.

Our support team have instant access to your server to upload additional data, add new users and modify current settings.

Electronic Data Discovery

Is your discovery material becoming more and more electronic?

Do you receive CD's, DVD's, External hard drives, memory sticks with huge quantities of emails and electronic files?

The volume of e-discovery material is growing exponentially, making information management a formidable challenge. Talk to us. We have the latest in Electronic discovery techniques to extract the

data quickly and efficiently. We can have your documents loaded as TIF or PDF OR in their original or native form. Each document can be coded, referenced and organised into a discovery database, ready to review.

Once review has been completed, produce and print your list of documents for the affidavit of discovery in minutes.

This will save you printing mountains of material and having to trawl through all of this paper.

Reducing the time required for processing is

an important part of effective case management and a more efficient workflow. Additionally, delivering effective tools that allow easier material search and review continues to be a priority both at GEON Legal Solutions and CT Summation.

Continued ... GEON goes Remote

Both Security and Fire Protection are very important for an online solution to ensure your data is safe. GEON has a full safety policy in place with the following features included:

Security

- Physical on site security for 24/7
- CCTV monitoring on perimeter and all internal sensitive areas.

- Proximity cards on all internal doors with iris scanners to technically sensitive areas.
- All access is electronically logged
- Intrusion detection system on doors and break glass detection on windows
- Electronic combination locks on front and rear of all cabinets.

Fire protection

- Vesda(Very early smoke detection) fire protection in air intakes to provide early detection
- Analogue addressable system to provide exact location
- 24/7 Monitoring

Contact us to setup your online remote access for the next big review that involves multiple parties in many locations around the world.

GEON Technical Support

The online support page is proving very successful. A number of 'how to' documents have been added outlining summation features. The audio visual library is expanding with many helpful demonstration on program areas. White Pa-

Papers, FAQ's and technical specifications are available to enhance your program knowledge. Why not visit and see for yourself
