

Specifying Search Settings for Transcripts

There are three settings you can specify for your transcript searches:

- **Show Q&A Pairs in Excerpt** - Specifies whether you want to display the full question and answer in the transcript that pertain to a search hit. This option applies to the way results are displayed on the **Search Results** window when transcripts are checked and searched from the **Case Explorer**.
- **AND Proximity (lines)** - Specifies the number of lines within which words separated by an **AND** connector in a search phrase must appear.
- **Display Radius (lines)** - Specifies the number of lines before and after a search hit that should be displayed on the **Search Results** window when transcripts are checked and searched from the **Case Explorer**.

These settings are all set in the **Transcripts** area of the **Search Settings** dialog box (shown below).

The image shows a screenshot of the "Search Settings" dialog box. It has a blue title bar and is divided into several sections. The "Transcripts" section includes a checked checkbox for "Show Q&A Pairs in Excerpt", a text box for "AND Proximity (lines)" with the value "5", and a text box for "Display Radius (lines)" with the value "2". The "ocrBase, eDocs, & Pleadings" section includes a text box for "AND Proximity (words)" with the value "50" and a text box for "Display Radius (words)" with the value "25". The "Search Settings" section includes a text box for "% Similar" with the value "80" and a text box for "Hits per Html Page" with the value "50". The "Intelli-Parse" section includes a checked checkbox for "Intelli-Parse" and a "Check" button. At the bottom are "OK" and "Cancel" buttons.

Search Settings Dialog Box

To specify search settings for transcripts:

1. Right-click inside the **Search** box and select **Search Settings**.
The **Search Settings** dialog box is displayed.
2. Specify your settings in the **Transcripts** area:
 - **Show Q&A Pair in Excerpt** - Check this option to display the full question and answer in the transcript that pertain to a search hit.
 - **AND Proximity (lines)** - Type the number of lines within which words separated by an **AND** connector in a search phrase must appear.
 - **Display Radius (lines)** - Type the number of lines before and after a search hit that should be displayed on the **Search Results** window.
3. Click **OK**.
Your settings are saved.
